

CLARITY

The world's first miniature high frame rate camera for live broadcast.

For real time replay from the highest quality image at up to 8x frame rates, the clarity is the solution for your HFR POV applications.

The Camera Corps Clarity camera is a speciality high-frame-rate (HFR) POV camera designed and custom built by Bexel to meet the increased demand of high frame rate capture for live production.

All cameras have an impressive HFR up to 8x and are compatible with today's servers including EVS for immediate live slo-mo replay.

Clarity is a complete camera system designed for easy set-up.

Technical Specifications

- HD HFR from 2x to 8x speeds in 50 Hz or 60 Hz - plus HD live output
